

Software Developer

As a software developer in a Fintech company with the mission to empower financial inclusion, you will be joining an awesome dev team implementing new features and enhancements to financial chatbot and multi-tiered web applications in a fast-paced environment. We use the latest cloud technologies (both Microsoft Azure and Amazon Web Services) and are looking for an avid learner with a passion for creating great software.

Job Responsibilities Include:

- Collaborate with stakeholders in the design and development of applications.
- Implement new features, refactor and fix bugs for existing applications.
- Write unit test scripts and perform QA for various processes/procedures.
- Research and conduct analysis in support of resolution of production issues.
- Demonstrate strong problem-solving capabilities and approach each problem in a logical and analytical manner with high degree of perseverance; produce definitive statement of the issues, and identification of alternative solutions, the recommended course of action, and the consequence of the decision.
- Anticipate and keep manager and project staff informed of future or planned events that could impact implementations.
- Work effectively both as a member of a team and independently; establish good judgment regarding routine, significant, and sensitive matters or those issues for which direct response is inappropriate and promptly apprise Manager
- Collaborate in daily scrum meetings and take charge of managing your tasks for your projects.
- Create documentations and other technical duties as needed.

Qualifications

- Bachelor's Degree in Computer Science, Information Systems or related technical field, required.
- Minimum of 2 years progressively responsible experience with web application development, MVC, APIs, SQL and Object-oriented programming required
- Expert knowledge of RDMS (at least one of these MySQL, SQL server or Oracle)
- Must technical skills: NodeJS, .NET, Java or C#, Angular, MVC, CSS, HTML, JavaScript, SQL and Git
- Nice to have: Azure bot framework, Azure Blob services, CosmosDB, SSIS, Python, etc.
- Ability to manage multiple tasks with changing priorities required.
- Proven record of multi-tiered application development with big datasets
- Knowledge of automated test suite or unit testing
- Experience with version control and release cycle
- Independent, a quick learner and familiar with agile methodologies
- Excellent analytical, organization, problem-solving, *communication* skills required.
